 Always on Top” Case Summary Window

Wouldn’t it be nice to get a “snapshot” view of an incident report with just a glance? ADSi’s Case Summary Window provides just that, and is always available. The summary automatically creates and maintains an “incident history” detailing all changes made to a record, and a complete list of persons involved, offenses committed, property collected, vehicles involved, arrests made, etc. All Case Summary entries are hyperlinked allowing quick access to the pertinent area of the report.

ADSi’s Public Safety Products

ADSi offers CADForce for dispatch operations, designed to help coordinate field personnel and manage resources. ADSi understands that with CAD, “downtime is not an option,” so our CAD is designed for maximum uptime and dependability.

DataForce Web LE, ADSi’s state-of-the-art Law Enforcement Records Management System, continues to provide all the functions you might expect from an electronic “filing cabinet,” such as secure and dependable record storage and retrieval, enhancing your agencies effectiveness in the courtroom. However, ADSi has raised the bar in records management, creating software that not only helps you to prosecute crimes – but can help you solve them, too! Utilizing the latest in programming technology, DataForce delivers investigative power to your agency like never before. The DataForce Search global search engine is included as a vital piece of all DataForce Web modules – and “Web” means you can access the system from anywhere in the world via a secure high-speed internet connection.

DataForce Web Fire, DataForce Web LE’s companion product developed specifically for the Fire Service, streamlining the management of all elements of your fire operations including incident reporting, inspections tracking, training, certifications, roster maintenance, apparatus & department inventory, hydrant records, and station logs.

ADSi also offers municipal court software, mug-shot imaging, CAD & records mapping, crime scene photo management, electronic crime scene diagramming, mobile data applications, bar-coding for property & evidence and inventory modules, and more.

When you're ready to upgrade or purchase new software, why not consider a company that has been faithfully serving public safety professionals like you for more than 25 years – under the same name, the same ownership, and the same management – A company with a proven track record…one that delivers software on-time and within your budget. That company is ADSi – specialists in public safety software since 1981.

History of ADSi

For more than 25 years, ADSi has supplied public safety departments with effective and dependable software tools. ADSi has installed software in more than 100 departments all across the United States at the City, County, State, and Federal government levels.

The secret to our success is no secret: First, we offer great software at a fair price. Second, we support our customers every step of the way (we have customers that have been with us for more than 20 years because we take such good care of them). Third, we listen to our customers – as a customer, you tell us what you need your software to do, and we continually strive to improve the software to exceed your expectations.

Adherence to National Crime Reporting Standards

• Agency Personnel
• Property & Evidence
• Training
• Inventory
• Traffic Citation
• Warrant Control
• Master Index System*  

* Sample Operational Minimum
Law Enforcement professionals know that in order to put bad guys behind bars... you first have to catch the bad guys. And at ADSi, we'd like to help.

ADSi is pleased to introduce DataForce Web LE, our state-of-the-art Law Enforcement Records Management System, which continues to provide all the functions you might expect from an electronic "filing cabinet," such as secure and dependable record storage and retrieval, enhancing your agencies effectiveness in the court room. However, ADSi has raised the bar in records management, creating software that not only helps you prosecute crimes – but can help you solve them, too! Utilizing the latest in programming technology, DataForce Web delivers investigative power to your agency like never before. The DataForce Search global search engine (see below) is included as a vital piece of all DataForce Web modules – and "Web" means you can access the system from anywhere in the world via a secure high-speed internet connection.

Harnessing the power, the flexibility, and the familiarity of the latest in browser technology (PHP & "AJAX"), ADSi created the ultimate in public safety software that will perform within the operating system of your choice (Windows, Linux, UNIX, Mac).

ADSi DataForce Web software can actually save you money on hardware, too, because any machine capable of hosting a web server can likely be designated as the DataForce Web Server, and any machine capable of running a web browser (IE, Mozilla, Netscape, Opera, Mac's Safari) can be designated as a DataForce Web Client. Oh yeah...no more updating individual clients - update the server, and clients are updated automatically!

**ADSi's “DataForce Search” Global Search Engine**

Looking for something? If so, type a keyword or two into the “always-on-top” DataForce Search box in the upper left corner of your screen and hit the “Enter” key. Whether you're looking for “misdemeanor," "Mitsubishi," or "Moon Dog," our global search engine will quickly find it no matter where it's hiding – even in the body of a narrative – and the results are hyperlinks that will take you right into the report.

**Seamless Integration with other ADSi Modules:**

Stand-alone products are nice, but integration is where it's at in this day and time. Now, Incident Searches performed from within DataForce Web LE can be instantly plotted via ADSi's Crime Mapping Module – see where the burglaries are happening, in a snap. Easily attach suspect photos to incident reports and create court-
quality line-ups using ADSi's ImageForce Mugshot Imaging Software. Import CAD incident info from ADSi's CADForce software with the push of a button, saving time and reducing duplication. And using ADSi's MDTForce Module, users in the field can create and submit reports from their patrol vehicles, resulting in officers spending more time on the road... catching bad guys.

**Enhanced Print Options**

Are your personnel accustomed to your agency’s forms? We thought so — that’s why ADSi’s printed reports look just like the ones you use every day. And for those trying to minimize paper forms, we’ve created PDF prints that can include attached images, sketches, etc. Once created, the entire PDF report can be saved, printed on paper, or even emailed. Records clerks will sing your praises thanks to our predefined print schemes – check a box and print only those forms defined as public access, media access, and so forth...no more hand copying certain pages.

**Customizable “My Desktop” Feature**

Need to see certain information each time you login? Just tell the system what you want to see, and each time you sign-on the info will greet you. Supervisors can see all reports needing approval, or all outstanding reports, etc. Officers/deputies can see the last several reports they submitted, the last several reports due, or some other configuration defined by you. And administrators can see all arrests made overnight, all calls dispatched, and so forth.

Plus, with ADSi's Refresh Frequency Setting, your desktop can be updated every day...every few minutes...or every few seconds, in fact.
